

# Cairns Base Hospital Level 3 West

**Client:** Queensland Health

**Location:** Cairns Base Hospital

## **Scope:**

Left as an empty shell after asbestos removal, this project was designed by Peddle Thorp Architects with a concept of creating functional training rooms, meeting rooms and office spaces.

With cost effective materials, the modern refurbishment creates interest and energy to any person who steps into the reception / waiting area. All rooms are fitted with either motorised or manual roller blinds, and the training rooms have blue light so that when projectors are used, there is no light interference.

The recessed ceilings and feature panels create stylish ambience throughout.
