

# CASA Cairns

**Client:** Civil Aviation Safety Authority

**Location:** Cairns

## **Scope:**

The Cairns Airport Administration Building renovation and refurbishment provides the Cairns Airport with a new bright and open office space for CASA employees.

Ample windows afford the employees with plenty of light and relaxing views into the tropical garden surrounds.

The new entry doors, funky feature-wall colours and graphics extend an open welcome to all visitors while the modern operable wall allows the meeting room to be closed off with ease when needed.

Built-in cubbyholes and shelves provide plenty of storage space for documentation.

A well-equipped kitchenette and dining-area allows the employees a place to relax, watch TV and eat in comfort.

Safety and security are ensured by the installation of fire alarms and access control.
